IEEE - WISE
Speaker Panel

6:00pm - 7:30pm
Tuesday, March 26th
Location: GB 202

What can you do with a background in Engineering or Computer Science? Are you interested going straight into the industry, entrepreneurship, or obtaining a professional degree in law or medicine?

We have THREE amazing speakers that will teach you all about the three choices! Refreshments will be served.

Entrepreneur, P. Eng., Rohit Shanker, is the President of Elora Consulting, a respected IT infrastructure, business process consulting, and web solutions development firm located in Toronto. He started the business when he was an engineering student at U of T. While living in Victoria University, he built a network appliance to manage residential networks effectively. Since then, his business has grown to provide software solutions for a broad spectrum of clients.

Scientific & Technical Oscar (from Academy Motion Picture) Award Winner Julia Pakalns. Julia received her undergraduate and masters degrees in computer science from the University of Waterloo. She currently works in the research group at Autodesk, developing software for 3D animation used in numerous films and videogames. In 2008, she received a Scientific & Technical Oscar from the Academy of Motion Picture Arts and Sciences for the design of the Autodesk® Maya® software Fluid Effects system, which uses an unconditionally stable semi-Lagrangian solver to simulate gaseous effects.

University of Toronto Law Student, Kevin P. Siu. Kevin was an Engineering Science graduate in 2011, and will be graduating law school in 2014. While studying in Engineering Science, he was also the president of the Engineering Society in 2010. He will be telling you all about the connection between engineering and law.
